### DETAILED ACTION

1. Claims 10-29 have been renumbered as 9-28 according to rule 1.126. Claims 1-28 are pending.

#### *Election/Restrictions*

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-2, 4, 6-19, 23-28, drawn to methods of identifying a compounds which binds to SEQ ID NO:2 or 5, methods for identifying compounds which modulate the activity of SEQ ID NO:2 or 5, method for identifying compounds which modulate the binding of Pyrin-1 to ASC, a method of identifying a compound which modulates the ASC-mediated activation of Nf-kB, a method for identifying a modulator of Pyrin-1 and a method for identifying a candidate compounds for treating an inflammatory disease, classified in class 435 subclass 4, 7.1.
  - II. Claims 3, 5, 20-22, drawn to a method for modulating the activity of SEQ ID NO:2 or 5, method of treating a disorder associated with inappropriate apoptosis comprising modulating the expression or activity of NBS-1 or pyrin-1, a method of modulating the ACS-activity of pyrin-1, a method for modulating the Nf-kB activity in a patient, and a method for treating an inflammatory disorder In a patient, classified , for example, in class 428, subclass 130.1 and class 514, subclass 44.

3. The inventions are distinct, each from the other because of the following reasons:

The methods of Groups I and II differ in the method objectives, method steps and parameters and in the reagents used. Group I is drawn to the identification of candidate compounds. Group II is drawn to the therapeutic treatment of patients, thus, the method objectives, active method steps and parameters of the two methods are not coextensive between the two groups.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent

Art Unit: 1642

subject matter and because the searches required for the groups are not co-extensive, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. This application contains claims directed to the following patentably distinct species of the claimed invention: SEQ ID NO:2 and SEQ ID NO:5..

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-28 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 1642

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karen Canella whose telephone number is (703) 308-8362. The examiner can normally be reached on Monday through Friday from 8:30 am to 6:00 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Caputa, can be reached on (703) 308-3995. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
